# ExpenseLogic 4.0

180° Expense Management

## The ExpenseLogic Software Suite

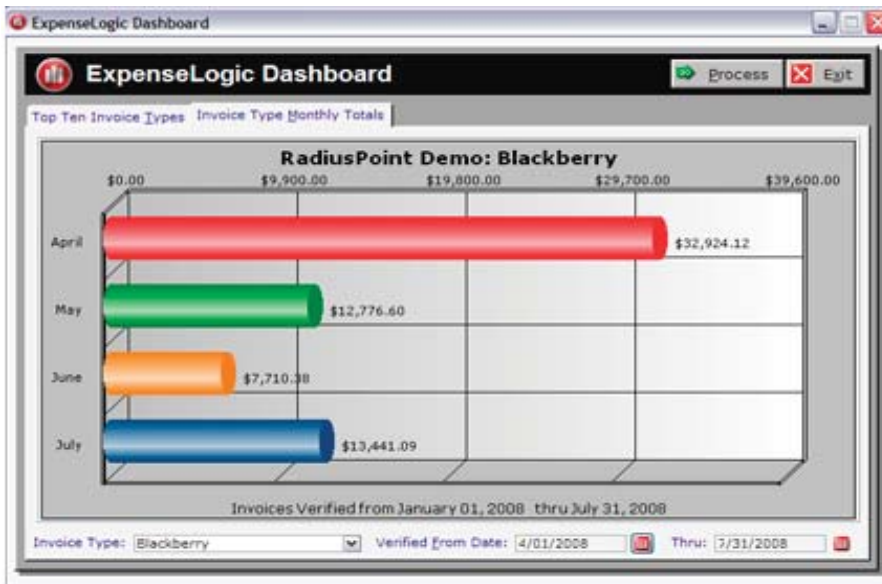

RadiusPoint's licensed software solution will fit your organization's need for visibility into your telecom, IT and energy expenses as well as your budgetary requirements. ExpenseLogic, RadiusPoint's proprietary software is scalable to your organization's size and the set-up and license is tailored to your specific needs. ExpenseLogic is currently assisting Fortune 100 companies down to small and medium-sized organizations with managing their Telecom and Utility invoices and expenses.

The ExpenseLogic software suite delivers Business Intelligence that you and your staff need to proactively manage the telecom and utility expenses of your organization from the entire lifecycle of the invoice- from receipt, processing, payment, and archival to auditing for errors, asset and inventory management and provisioning as well as intelligent dashboard analytics. Operational analysis and tracking are completed in a secure environment using pre-defined business dimensions.

**Start.Shift.Accelerate**

We dare you to measure our performance!

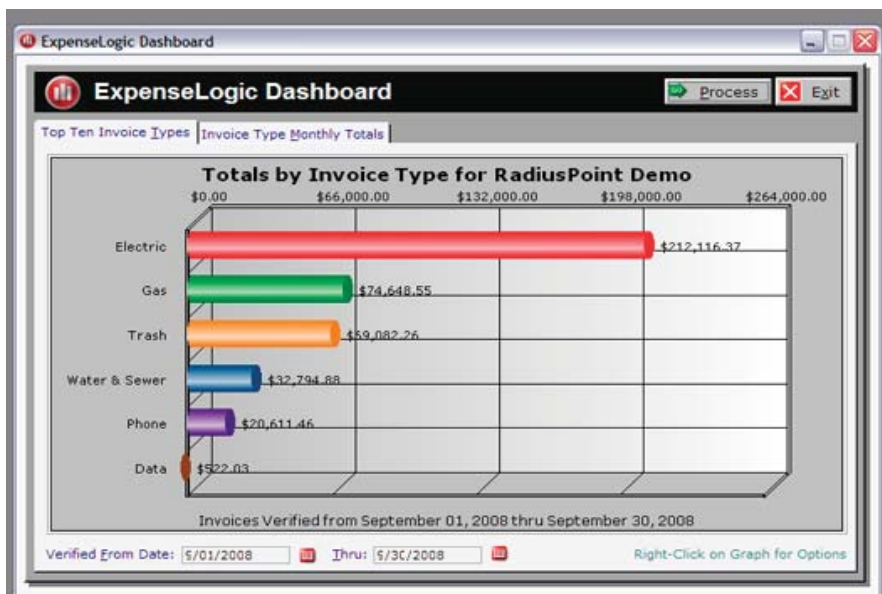

## Business Intelligence Dashboard- Invoice Type Monthly Totals

RadiusPoint offers a tailored approach with our reporting analytics available in ExpenseLogic. The filtering capabilities allow for users to mine specific data needed for their department, cost center, location, region or district. The ExpenseLogic software meets the needs of the financial, operations, telecom, IT and Utilities/Facilities departments by providing visibility into your organization's expenses right at your desktop. Reporting capabilities include:

Filter for date range (invoice date, start service date, end service date, due date, verification date, and check date)

## Business Intelligence Dashboard- Top Ten Invoice Types
